EDUCATION

University of California, Berkeley

B.A. Data Science.

May 2027

Los Angeles Pierce College

A.S. Mathematics | A.S. Physics | A.S. Computer Science. President's Honors List, Full-time Dean's Honors List.

Jul 2025

EXPERIENCE

Technical Project Manager, AI & LLM Integration

Jul 2026 – Present

LG NOVA

- Lead the Atlas AI subteam after promotion from Developer, translating client requirements into sprint milestones for an LLM-powered natural language dashboard built on a Flask/pgvector backend and React/TypeScript frontend.
- Bridge stakeholders and engineers to keep the team shipping on a live enterprise product while maintaining alignment across technical and non-technical audiences.
- Previously engineered data pipelines integrating fragmented team data into Atlas and built core components of the LLM-powered natural language query interface.

AI Researcher, CDSS Data Discovery Program

Sep 2026 – Present

UC Berkeley College of Computing, Data Science, and Society

- Selected for the CDSS Data Discovery Program to research the KnaiTai Open Initiative, building knowledge-native AI systems that bridge structured programming knowledge with LLM reasoning.
- Own the Experts + APPLY workstream, designing a common abstraction for invoking heterogeneous computations.

Machine Learning Team Member

Jan 2026 – May 2026

Open Project

- Engineered spatial ML pipelines and regression models in PyTorch and scikit-learn on multi-source geospatial data, applying feature engineering, high-dimensional ingestion, and cross-validation to improve model robustness.

Founder and Mathematics Tutor

Jan 2024 – Sep 2025

Private Tutoring Services

- Designed first-principles frameworks for Calculus, Linear Algebra, and Statistics tailored to individual student gaps; delivered personalized curricula across 20+ sessions, driving a 60% average improvement in exam scores.

PROJECTS

Scout

Autonomous AI Market Intelligence Engine

- Architected an agentic LLM/RAG pipeline mining patents, VC funding, and research to surface market opportunities; generated startup concepts, TAM/SAM/SOM sizing, MVP specs, and pitch decks end-to-end from a single query.

GIStice League

Spatial ML for Food Desert Mapping

- Built a spatial ML pipeline in PyTorch/scikit-learn quantifying grocery access inequities across 500 census tracts; engineered a composite Accessibility Index from 10+ variables, shipping dashboards adopted by advocacy groups.

FinSight

Full Stack Wealth & Retirement Simulator

- Built a full-stack retirement simulator in Next.js/TypeScript running Monte Carlo simulations for portfolio modeling; shipped AI-driven expense categorization and budget visualizations via a FastAPI backend on Vercel.

CERTIFICATIONS

- Intermediate Machine Learning, Kaggle (XGBoost, cross-validation, data leakage prevention, feature encoding)
- Intro to Deep Learning, Kaggle (TensorFlow, Keras, neural network architecture, performance tuning)
- Artificial Intelligence Fundamentals, IBM (ML principles, AI ethics, applied AI systems)

SKILLS

Languages: Python, SQL, Java, C++, TypeScript, JavaScript

Machine Learning: PyTorch, TensorFlow, Keras, scikit-learn, XGBoost, LLMs, RAG, NLP, Vector DBs, Agentic AI

Data & Frameworks: NumPy, Pandas, GeoPandas, Plotly.js, Next.js, React.js, FastAPI, Tailwind CSS, Vercel
