EDUCATION

University of California, Berkeley

B.A. Data Science

Aug 2025 – May 2027

Berkeley, CA

Los Angeles Pierce College

A.S. Mathematics | A.S. Physics | A.S. Computer Science

Jan 2023 – Jul 2025

Los Angeles, CA

Honors: President's Honors List, Full-time Dean's Honors List

EXPERIENCE

Machine Learning Engineer

Open Project

Feb 2026 – May 2026

Berkeley, CA

Engineered spatial machine learning pipelines and regression models using PyTorch and scikit-learn; implemented feature engineering, high dimensional data ingestion, and cross validation strategies across multi-source geospatial datasets.

Founder, Private Tutoring Services

Mathematics Tutor

Jan 2024 – Sep 2025

Los Angeles, CA

Designed first principles problem solving frameworks for Calculus, Linear Algebra and Statistics, achieving an average 60% exam score improvement by identifying individual learning gaps and building personalized curricula across over 20 sessions.

PROJECTS

Scout | Autonomous AI Market Intelligence Engine | Python, LLMs, RAG, Agentic Workflows, NLP, Vector DBs, FastAPI

Architected an autonomous market intelligence engine ingesting global signals across patents, VC funding and research papers, then engineered an agentic LLM and RAG pipeline that generates startup concepts, estimates TAM/SAM/SOM sizing, drafts MVP specs and produces investor pitch decks from a single query.

GISTice League | Spatial ML for Food Desert Mapping | Python, PyTorch, GeoPandas, scikit-learn, Leaflet.js, Plotly.js

Built a spatial ML pipeline in PyTorch and scikit-learn quantifying grocery access inequities across 500 census tracts, engineering a composite Accessibility Index against over 10 demographic variables and visualizing results through interactive Leaflet.js dashboards adopted by community advocacy groups.

FinSight | Full Stack Wealth & Retirement Simulator | Python, Next.js, TypeScript, React.js, Tailwind CSS, FastAPI, Vercel

Developed a full stack retirement simulator in Next.js and TypeScript running stochastic Monte Carlo simulations to model long term portfolio outcomes, with AI driven expense categorization and dynamic budget visualizations served through a FastAPI backend deployed on Vercel.

CERTIFICATIONS

Intermediate Machine Learning | Kaggle | XGBoost, cross-validation, data leakage prevention, feature encoding

Intro to Deep Learning | Kaggle | TensorFlow, Keras, neural network architecture, performance tuning

Artificial Intelligence Fundamentals | IBM | ML principles, AI ethics, applied AI systems

TECHNICAL SKILLS

Languages: Python, SQL, Java, C++, TypeScript, JavaScript

AI / ML: PyTorch, TensorFlow, Keras, scikit-learn, XGBoost, LLMs, RAG, NLP, Deep Learning, Agentic Workflows, Vector Databases, Feature Engineering, Cross-Validation, Monte Carlo Simulation

Data Science & Analytics: NumPy, Pandas, Matplotlib, Plotly.js, GeoPandas, Statistical Modeling, Stochastic Simulation, Optimization Models

Frameworks & Libraries: Next.js, React.js, FastAPI, Tailwind CSS, Leaflet.js, Vercel

Developer Tools: GitHub, VS Code, Jupyter Notebook, Overleaf
