EDUCATION

University of California, Berkeley <i>B.A. Data Science</i>	Aug 2025 – May 2027
Los Angeles Pierce College <i>A.S. Mathematics A.S. Physics A.S. Computer Science</i> Honors: President's Honors List, Full-time Dean's Honors List	Jan 2023 – Jul 2025

EXPERIENCE

Technical Project Manager – AI & LLM Integration <i>LG NOVA</i> - Promoted from Developer to lead the Atlas AI subteam, translating client requirements into sprint milestones for an LLM-powered natural language dashboard spanning a Flask/pgvector backend to a React/TypeScript frontend, while bridging stakeholders and engineers to keep the team shipping on a live enterprise product. - Previously engineered data pipelines integrating fragmented team data into Atlas and built core components of the LLM-powered natural language query interface.	Jul 2026 – Present
AI Researcher, CDSS Data Discovery Program <i>UC Berkeley College of Computing, Data Science, and Society</i> Selected for the CDSS Data Discovery Program to research the KnaiTai Open Initiative, building knowledge-native AI systems that bridge structured programming knowledge with LLM reasoning; own the Experts + APPLY workstream, designing a common abstraction for invoking heterogeneous computations.	Sep 2026 – Present
Machine Learning Team Member <i>Open Project</i> Engineered spatial ML pipelines and regression models in PyTorch and scikit-learn on multi-source geospatial data, applying feature engineering, high-dimensional ingestion, and cross-validation to improve model robustness.	Jan 2026 – May 2026
Founder, Private Tutoring Services <i>Mathematics Tutor</i> Designed first-principles frameworks for Calculus, Linear Algebra, and Statistics tailored to individual gaps; delivered personalized curricula across 20+ sessions, driving a 60% average improvement in exam scores.	Jan 2024 – Sep 2025

PROJECTS

Scout <i>Autonomous AI Market Intelligence Engine</i> Python, LLMs, RAG, Agentic Workflows, NLP, Vector DBs, FastAPI Architected an agentic LLM/RAG pipeline mining patents, VC funding, and research to surface market opportunities; generated startup concepts, TAM/SAM/SOM sizing, MVP specs, and pitch decks end-to-end from a single query.
GISTice League <i>Spatial ML for Food Desert Mapping</i> Python, PyTorch, GeoPandas, scikit-learn, Leaflet.js, Plotly.js Built a spatial ML pipeline in PyTorch/scikit-learn quantifying grocery access inequities across 500 census tracts; engineered a composite Accessibility Index from 10+ variables, shipping dashboards adopted by advocacy groups.
FinSight <i>Full Stack Wealth & Retirement Simulator</i> Python, Next.js, TypeScript, React.js, Tailwind CSS, FastAPI Built a full-stack retirement simulator in Next.js/TypeScript running Monte Carlo simulations for portfolio modeling; shipped AI-driven expense categorization and budget visualizations via a FastAPI backend on Vercel.

CERTIFICATIONS

- Intermediate Machine Learning** – *Kaggle* (XGBoost, cross-validation, data leakage prevention, feature encoding)
- Intro to Deep Learning** – *Kaggle* (TensorFlow, Keras, neural network architecture, performance tuning)
- Artificial Intelligence Fundamentals** – *IBM* (ML principles, AI ethics, applied AI systems)

TECHNICAL SKILLS

Languages: Python, SQL, Java, C++, TypeScript, JavaScript
Machine Learning: PyTorch, TensorFlow, Keras, scikit-learn, XGBoost, LLMs, RAG, NLP, Vector DBs, Agentic AI
Data & Frameworks: NumPy, Pandas, GeoPandas, Plotly.js, Next.js, React.js, FastAPI, Tailwind CSS, Vercel
