EDUCATION

University of California, Berkeley

B.A. Data Science.

May 2027

Los Angeles Pierce College

A.S. Mathematics | A.S. Physics | A.S. Computer Science. President's Honors List | Full-time
Dean's Honors List. GPA: 3.8.

Jul 2025

EXPERIENCE

Technical Project Manager, AI & LLM Integration

Jul 2026 – Present

LG NOVA

- Promoted from developer to project manager, leading 18 student engineers through UC Berkeley's Open Project to build Atlas, LG NOVA's LLM-powered ops dashboard; own sprint planning and delivery on a Flask/pgvector backend with a React/TypeScript frontend.
- Serve as the liaison between LG NOVA's stakeholders and the engineering team, translating requirements into sprint-ready work.
- Prior to promotion, built the data pipelines feeding fragmented team data into Atlas and wrote core components of the natural language query interface.

AI Researcher, CDSS Data Discovery Program

Sep 2026 – Present

UC Berkeley College of Computing, Data Science, and Society

- Selected for UC Berkeley's CDSS Data Discovery Program to research KnaïTai, building knowledge-native AI systems that connect structured programming knowledge with LLM reasoning.
- Own the Experts + APPLY workstream: a common abstraction layer for invoking all kinds of computations uniformly.

Machine Learning Team Member

Jan 2026 – May 2026

Open Project

- Built spatial ML pipelines and regression models in PyTorch and scikit-learn on multi-source geospatial data, incorporating feature engineering, high-dimensional data ingestion, and cross-validation.

Founder and Mathematics Tutor

Jan 2024 – Sep 2025

Private Tutoring Services

- Founded a tutoring business offering first-principles curricula in Calculus, Linear Algebra, and Statistics, tailored to individual student gaps; conducted 20+ sessions with a 60% average score improvement.

PROJECTS

Scout: Autonomous AI Market Intelligence Engine

- Built an agentic LLM/RAG pipeline that mines patents, VC funding data, and research publications to surface market opportunities, transforming a single query into startup concepts, TAM/SAM/SOM sizing, MVP specs, and a pitch deck.

GISTice League: Spatial Machine Learning for Food Desert Mapping

- Built a spatial ML pipeline in PyTorch and scikit-learn to quantify grocery access inequities across 500 census tracts, aggregating 10+ variables into a single Accessibility Index used by advocacy groups.

FinSight: Full-Stack Wealth and Retirement Simulator

- Built a full-stack retirement simulator in Next.js and TypeScript running Monte Carlo simulations for portfolio modeling, with AI-driven expense categorization and budget visualizations on a FastAPI backend deployed on Vercel.

CERTIFICATIONS

- Intermediate Machine Learning, Kaggle: XGBoost, cross-validation, data leakage prevention, feature encoding
- Intro to Deep Learning, Kaggle: TensorFlow, Keras, neural network architecture, performance tuning
- Artificial Intelligence Fundamentals, IBM: machine learning principles, AI ethics, applied AI systems

SKILLS

Languages: Python, SQL, TypeScript, JavaScript, Java, C++

Machine Learning: PyTorch, TensorFlow, Keras, scikit-learn, XGBoost, LLMs, RAG, NLP, Vector Databases, Agentic AI

AI & APIs: Claude API, RAG Pipelines, LangChain, pgvector

Frameworks & Tools: React.js, Next.js, FastAPI, Flask, Tailwind CSS, Vercel, Git

Data: NumPy, Pandas, GeoPandas, Plotly.js
