EDUCATION

University of California, Berkeley

May 2027

B.A. Data Science | Domain Emphasis: Business/Industrial Analytics

Relevant Coursework: Machine Learning, Probability & Statistical Inference, Data Structures & Algorithms, Programming Fundamentals, Data Mining & Analytics, AI Ethics

Honors: 1st Place Pitch Winner, UC Berkeley SCET Connected Life

Los Angeles Pierce College

Jul 2025

A.S. Mathematics | A.S. Physics | A.S. Computer Science. President's Honors List | Full-time Dean's Honors List. GPA: 3.8.

EXPERIENCE

LG NOVA

Jul 2026 – Present

Technical Project Manager, AI & LLM Integration

- Promoted from developer to PM; lead 18 student engineers through UC Berkeley's Open Project to build Atlas, LG NOVA's LLM powered ops dashboard, owning sprint planning and delivery on a Flask/pgvector backend with a React/TypeScript frontend.
- Liaise between LG NOVA stakeholders and the engineering team, translating requirements into sprint-ready work; previously built Atlas's data pipelines and core natural language query components

UC Berkeley College of Computing, Data Science, and Society

Sep 2026 – Present

AI Researcher, CDSS Data Discovery Program

- Selected for a competitive research program to build KnaiTai, a knowledge-native AI/ML system connecting structured programming knowledge with LLM reasoning.
- Own the Experts + APPLY workstream, designing a common abstraction layer for uniformly invoking computations across tools and APIs.

IDX Exchange

Sep 2026 – Present

Software Development Intern

- Building a full-stack property search web application (React, Node.js/Express, MySQL) on the Listings Platform Team, implementing filterable search, pagination, and RESTful API endpoints.
- Writing unit and integration tests (Jest, React Testing Library) targeting 70%+ code coverage; following an Agile, feature-branch Git workflow with CI-ready deployments to Vercel and Railway.

Open Project, UC Berkeley

Jan 2026 – May 2026

Machine Learning Team Member

- Built and validated spatial machine learning pipelines and regression models (PyTorch, scikit-learn) on multi-source geospatial data, applying feature engineering, high-dimensional data ingestion, and cross-validation.

Private Tutoring Services

Jan 2024 – Sep 2025

Founder and Mathematics Tutor

- Founded and operated a tutoring business, designing first-principles Calculus, Linear Algebra, and Statistics curricula tailored to individual student needs; delivered 20+ sessions, achieving a 60% average score improvement.

PROJECTS

Scout: Autonomous AI Market Intelligence Engine

- Built an agentic LLM/RAG pipeline mining patents, VC funding data, and research publications to transform a single query into startup concepts, TAM/SAM/SOM sizing, MVP specs, and a pitch deck.

GISlice League: Spatial Machine Learning for Food Desert Mapping

@ Open Project, UC Berkeley

- Built a spatial ML pipeline (PyTorch, scikit-learn) quantifying grocery access inequities across 500 census tracts via a 10+ variable Accessibility Index adopted by advocacy groups.

FinSight: Full-Stack Wealth and Retirement Simulator

- Built a full-stack retirement simulator (Next.js, TypeScript) running Monte Carlo portfolio simulations, with AI-driven expense categorization and budget visualizations on a FastAPI backend deployed on Vercel.

CERTIFICATIONS

- Intermediate Machine Learning, Kaggle: XGBoost, cross-validation, data leakage prevention, feature encoding
- Intro to Deep Learning, Kaggle: TensorFlow, Keras, neural network architecture, performance tuning
- Artificial Intelligence Fundamentals, IBM: machine learning principles, AI ethics, applied AI systems

SKILLS

Languages: Python, SQL, TypeScript, JavaScript, Java, C++

Software Engineering: React.js, Next.js, Node.js/Express, FastAPI, Flask, REST APIs, SQL/MySQL, Docker, Git, CI/CD, Tailwind CSS, Vercel

AI/ML Engineering: PyTorch, TensorFlow, Keras, scikit-learn, XGBoost, LLMs, RAG Pipelines, LangChain, pgvector, NLP, Vector Databases, Agentic AI, Claude API

Product & Project Management: Agile/Scrum, Sprint Planning, Backlog Prioritization, Stakeholder Management, Cross-functional Team Leadership, Roadmapping

Data: NumPy, Pandas, GeoPandas, Plotly.js

HOBBIES

Cooking, Snowboarding, Public Speaking, Chess, Karaoke
